

# **Budapest University of Technology and Economics**

# Faculty of Transportation Engineering and Vehicle Enginee

1. Subject name	Design of material handling machines - project				
2. Subject name in Hungarian	Anyagmozgatógép projekt				
3. Code	BMEKOALM643	4. Evaluation type	mid-term grade	5. Credits	5
6. Weekly contact hours	2 (10) Lecture	2 (11) Practice	0 (0) Lab		
7. Curriculum	Vehicle Engineering MSc (J)	8. Role	Specialization (sp) at Vehicle Engineering MSc (J)		
9. Working hours	for fulfilling the req	uirements of the si	ubject		150
Contact hours	56	Preparation for seminars	12	Homework	30
Reading written materials	32	Midterm preparation	0	Exam preparation	20
10. Department	Department of Material Handling and Logistics Systems				
11. Responsible lecturer	Dr. Bohács Gábor				
12. Lecturers	Gáspár Dániel, Szabó Péter, Odonics Boglárka				
13. Prerequisites					
14. Description of	lectures				

Material handling machine design project goal, steps, documents. Theoretical basics of scaling of material handling machines, presentation of the relevant standardization background. Overview of scales for lifting machines. Conditions for installing conveyor systems. Based on the special demands of the industry's machines, solving a complex machine design

### 15. Description of practices

Presentations are presented in the context of examples. Consultation on planning task.

16. Description of labortory practices

### 17. Learning outcomes

#### A. Knowledge

Knowledge of materials handling systems projects in terms of structure and activities.

# B. Skills

task.

- He is able to assess solutions to a certain problem.
- Capable of implementing his work in the framework of a project.
- He is able to support the planning and research and development processes.

#### C. Attitudes

• Strive to maximize their abilities to make their studies at the highest possible level, with a profound and independent knowledge, accurate and error-free, in compliance with the rules of the applicable tools, in collaboration with the instructors.

#### D. Autonomy and Responsibility

• Takes responsibility for the quality of the work and the ethical standards that set an example for the classmates, using the knowledge acquired during the course.

## 18. Requirements, way to determine a grade (obtain a signature)

Midterm grade: submitting 1 homework and presentation of homework. Final grade comes from the final presentation (50%) and from the documentation (50%).

## 19. Opportunity for repeat/retake and delayed completion

The projects final submission can be retaken once each.

## 20. Learning materials

Students can download the subject notes in pdf format via Moodle.

Effective date 10 October 2019 This Subject Datasheet is valid for Inactive courses
