

| | | | | | |
|---|--|---------------------------------|--|-------------------------|------------|
| 1. Subject name | Accident analysis II., simulation methods | | | | |
| 2. Subject name in Hungarian | Balesetelemzés II, szimulációs módszerek | | | | |
| 3. Code | BMEKOGGM655 | 4. Evaluation type | mid-term grade | 5. Credits | 5 |
| 6. Weekly contact hours | 2 (10) Lecture | 0 (0) Practice | 2 (11) Lab | | |
| 7. Curriculum | Vehicle Engineering MSc (J) | 8. Role | Specialization (sp) at Vehicle Engineering MSc (J) | | |
| 9. Working hours for fulfilling the requirements of the subject | | | | | 150 |
| Contact hours | 56 | Preparation for seminars | 18 | Homework | 24 |
| Reading written materials | 42 | Midterm preparation | 10 | Exam preparation | 0 |
| 10. Department | Department of Automotive Technologies | | | | |
| 11. Responsible lecturer | Dr. Török Árpád | | | | |
| 12. Lecturers | Dr. Melegh Gábor, Dr. Török Árpád, Vida Gábor | | | | |
| 13. Prerequisites | strong: KOGGM654 - Accident analysis I., forensic processes | | | | |
| 14. Description of lectures | | | | | |
| <p>Description of Collision Models Used in Vehicle Dynamic Simulation Software Suitable for Accident Reconstruction. Examination and analysis of complete, regular and irregular vehicle motion processes by simulation methods: determination of the range of required input parameters, delimitation of the questions to be answered based on the available parameters, interpretation of probability statements. Parameter sensitivity analysis of simulation results. Evaluation, analysis, interpretation, and plausibility of the results provided by simulation software.</p> | | | | | |
| 15. Description of practices | | | | | |
| 16. Description of laboratory practices | | | | | |
| To deepen the knowledge acquired during the lectures by solving real tasks with simulation software. | | | | | |
| 17. Learning outcomes | | | | | |
| A. Knowledge | | | | | |
| <ul style="list-style-type: none"> The student is familiar with the legal framework needed to understand the legal environment of road safety; The student has to know the basic components of the process of legislation and law enforcement; The student has to know the basic purpose and means of transport law; The student has to know the online and printed aids and applications needed to apply traffic law. | | | | | |
| B. Skills | | | | | |
| <ul style="list-style-type: none"> The student is able to interpret the related legislation; The student is able to apply and use relevant traffic laws; The student is able to support the planning and research and development processes. | | | | | |
| C. Attitudes | | | | | |
| <ul style="list-style-type: none"> The student aims to maximize their abilities by making their studies at the highest possible level, proficient and independent; The student aims to cooperate with the instructor and the other students to improve knowledge; The student aims to continue to improve the knowledge of the material parts of the lessons through continuous independent learning; The student aims to use the information technology and computing tools (word processing computer software, mathematical software, image editing software, etc.), but also seeks to use classical devices (paper, ruler, pencil, hand-held calculator, editing, etc.); The student aims to get to know and routinely use the tools needed to solve the tasks; The student aims to provide accurate, error-free and precise work. | | | | | |
| D. Autonomy and Responsibility | | | | | |
| <ul style="list-style-type: none"> The student is responsible for setting an example for the other students regarding the quality of its work and ethical | | | | | |

standards;

- The student applies the knowledge acquired during the course in a responsible manner with regard to their validity limits;
- The student accepts openly the grounded critical remarks;
- The student accepts the framework for cooperation, can do its job independently or as part of a team, depending on the situation.

18. Requirements, way to determine a grade (obtain a signature)

During the semester 1 midterm test has to be completed with more the 50% of the maximal points.

The conditions for obtaining the midterm grade are the completing the midterm test, attending all labs and submitting the homework on accepted level.

Final outcome of the subject is defined by the result of the mid-term exam in 60% proportion, and the homework in 40% proportion. All requirements have to be fulfilled to successfully finish the subject.

19. Opportunity for repeat/retake and delayed completion

The midterm test can be retaken once. The homework can be delivered once additionally. One lab can be done once additionally.

20. Learning materials

Slides and presentation notes
