

Faculty of Transportation Engineering and Vehicle Engineering

1. Subject name	Process planning					
2. Subject name in Hungarian	Folyamattervezés					
3. Code	BMEKOALM331	4. Evaluation type	exam grade	5. Credits	3	
6. Weekly contact hours	2 (9) Lecture	1 (5) Practice	0 (0) Lab			
7. Curriculum	Logistics Engineering MSc (L)	8. Role	Mandatory (mc) at Logistics Engineering MSc (L)			
9. Working hours	for fulfilling the req	uirements of the su	ubject		90	
Contact hours	42	Preparation for seminars	0	Homework	29	
Reading written materials	0	Midterm preparation	0	Exam preparation	19	
10. Department	Department of Material Handling and Logistics Systems					
11. Responsible lecturer	Dr. Kovács Gábor					
12. Lecturers	Dr. Kovács Gábor, Bakos András					
13. Prerequisites						
14. Description of	lectures					
hat a manual at land of the s		and a set of the second		and a state of the state of a state.	a deserviced and the s	

Interpretation of the process, parts, contacts, activities, events and processes. Standard methods for the description of the processes. Process Charting Techniques. Process Description levels. Top-down and bottom-up modeling. Standard process description languages. Standard Operating Procedure. Cross-Functional Flowchart. Petri net. Event Driven Process Chain (EPC). Business Process Modeling Notation (BPMN). Integrated Definition Methods (IDEF). Unified Modeling Language (UML). System Modeling Language (SysML). Yet Another Workflow Language (YAWL). Hybrid modeling. Business Process Reengineering (BPR). Executable languages (BPEL). Logistics processes modelled by using the standard languages: goal-oriented application.

15. Description of practices

Exercising process description languages (SOP, EPC, BPMN) and process planning techniques (BPR) through examples. Preparation of homework.

16. Description of labortory practices

17. Learning outcomes

A. Knowledge

- Knowledge of process modeling basics.
- Knowledge of process descriptive languages.
- B. Skills
 - Modeling processes with standard methods based on written and oral naive descriptions.
 - Able to detect process failures and re-design processes based on them.
- C. Attitudes
 - Strive to maximize their abilities to make their studies at the highest possible level, with a profound and independent knowledge, accurate and error-free, in compliance with the rules of the applicable tools, in collaboration with the instructors.
- D. Autonomy and Responsibility
 - Take responsibility for the quality of the work and the ethical standards that set an example for the classmates, using the knowledge acquired during the course.

18. Requirements, way to determine a grade (obtain a signature)

1 homework (weights: 25% for the part-performance check, 25% for the <u>final submission</u>) of each at least 50% performance is the condition of signature, exam (weight: 50%)

19. Opportunity for repeat/retake and delayed completion

The part-performance check and the final submission can both be resubmitted once.

20. Learning materials

Students can download the subject notes in pdf format via Moodle.						
Effective date	10 October 2019	This Subject Datasheet is valid for	Inactive courses
