

Vehicle mechanics fundamentals

requirements

1. General

To get the credits of the subject, students need to take a successful exam that covers the full subject material. The requirement of the exam is signature for the semester based on two mid-term exams and approval of proper Semester championship project documentation.

2. Mid-term exams

Two mid-term exams will be held, according to the schedule presented on lectures. Subsequent occasions will follow the main ones, as replacement exams – also communicated on lectures. The first exam will cover the lectures and labs until the date of exam, while the second covers the part taught after the first mid-term exam.

3. Term mark

To avoid semester exam, students – if both mid-term exam results are at least grade 'pass(2)' - can accept the average percentage as a base for their semester grade. Even if results are still just 'pass (2)'. Grade will be determined according to the current university rules. The approved Semester championship project is a valid precondition for this scenario as well.

4. Semester race

Semester simulation championship will be held, by result students can get some advantage according to the following table by their results:

- 1. Right to skip one mid-term exam with proven grade 5, that the student can choose*
- 2. +40% to the result of freely chosen midterm exam*
- 3. +30% to the result of freely chosen midterm exam*
- 4. +20% to the result of freely chosen midterm exam, except it is lower than grade pass (2)*
- 5. +15% to the result of freely chosen midterm exam, except it is lower than grade pass (2)*
- 6. +10% to the result of freely chosen midterm exam, except it is lower than grade pass (2)*
- 7. +5% to the result of freely chosen midterm exam, except it is lower than grade pass (2)*
